MORE PHOTOS AND LOGISTICS COMING ON EACH.....

All of the Individual Buildings you will see below are “Resurrection-Ready”!

Progress Encroaching on Magnificent Buildings: Welcome the story of Glorious Resurrection!

The buildings you see here are ready to be reconstructed wherever you say. They’re all yours! They are here because, yes, they have been threatened by the bulldozer. They have been either physically removed to *temporary safety* by an AGN Network Professional or are still standing under their watchful eye, “under contract in the field”, in hopes of adoption. They are all *temporarily* “saved”. None of them are *really* saved until they are adopted by a citizen-steward or a designer to be reconstructed into a new future, in a new location.

The Buildings you see here are “Resurrection Ready”. They get documented, numbered and tagged, meticulously and methodically deconstructed, whisked away to safety, repaired and placed in watchful storage by trained Network Professionals. Some have been freshly rescued. Some are still standing. Some have been lingering in storage for years. Storage tends to cost insistent dollars and is not to be viewed as a perpetual solution. The AGN Network Professionals are footing those bills for us right now.

But we have an idea.....(continued at the bottom of the page)

They are all *temporarily* “saved”. None of them are *really* saved until they are adopted by a citizen-steward or a designer to be reconstructed into a new future, in a new location.

If no one comes forward, many scenarios ensue, Some of these buildings may be “partially saved”; that is; they will be deconstructed for partition, that is, for their parts, which will be used to provide fabulous American Pioneer Texture Décor in *New to Look Old* Home Construction. Many heritage buildings will be destroyed by comprehensive demolition. Some will completely and irrevocably collapse in a dangerous heap from private financial struggle; re-roofing a huge barn for a retired farmer who is no longer using the building is dauntingly expensive. In that case, yes, snapped, craftsman-created heritage hand hewed timbers *do* go to landfill.

They get documented, numbered and tagged, meticulously and methodically deconstructed, whisked away to safety, repaired and placed in watchful storage by trained Network Professionals. Yes, it’s awful when civilization encroaches and an Antique Heritage Icon is destroyed in order to make room for “progress”. “Ain’t it Awful?” is a valid tale of woe. Destruction is currently the standing default American Solution to suburban sprawl. Yet, here is a beginning thought to the depository on this issue: Instead of *fighting* this trend of geographically re-shuffling populations, perhaps strengthening the protocol of deconstructing and reconstructing displaced antique buildings in order to save them can become *accepted common practice*.. We could easily slot the Reconstruction of Antique Buildings gracefully and effortlessly into corresponding New Old House “Best Practices” in this country.

Progress is a factoid of life for good reasons. Creating Antique Architecture Migrations in positive response to inevitable Population Migrations in a harmonious way is a global trend we can embrace with our nifty new Reconstruction Preservation Protocol! In fact, the United States could Pioneer this Movement worldwide! We're World Famous for the Pioneering, Melting Pot thing already.

These homeless buildings represent our American Heritage and the Pioneer Struggle of the Rugged Individuals who *literally* "built" this country with the Yankee Know-How they imported from cultures worldwide. It's not necessary to helplessly stand by saying "Ain't it Awful?" That's beneath the Pioneer Spirit! Progress is here to stay and we need to create a pro-active response to it. We can honor our venerable homesteading pioneers with a pioneer homesteading protocol: a Resurrection Explosion. (Reconstruction has been happening since Medieval times. It "ain't that hard"....)

We can Reshuffle and Relocate these magnificent buildings as an ordinary part of our "New to Look Old" Best Practices to meet the population shifts of modern and future times!

Yes or Yes, America?

For further conceptual reaches on this issue, and some ideas about why it's *not* common practice, consult our News Page and share your ideas! We need 'em!
